LADDER SAFETY TRAINING

Little Giant Ladder Systems is a member of the American Ladder Institute (ALI), a national trade association whose mission is to inform the public on the proper selection, care and safe use of ladders.

ALI is the American National Standards Institute (ANSI) approved developer of industry standards. ALI has recently partnered with the National Institute of Occupational Safety & Health (NIOSH) on safety research.

ALI has developed an online ladder safety training certification program available on: www.laddersafetytraining.org. This program is intended to appeal to all audiences, from professionals who work in the construction and industrial trades to consumers who use ladders in their home. The information on this site is organized by ladder type, with additional resources listed for more technical support.
